Tideway European Equity Income Fund (the "Fund"), Class A GBP Accumulation Shares, a sub-fund of Tideway UCITS Funds ICAV (the "ICAV") (ISIN: IE00BG0P4371)

The Fund is managed by Link Fund Manager Solutions (Ireland) Limited, part of the Asset Services Division of Link Administration Holdings Limited.

Objectives and Investment Policy

Objective

The Fund aims to deliver long term investment returns ahead of inflation from a combination of income and capital growth.

Investment Policy

The Fund is actively managed and will seek to achieve its objective through investment in a diversified portfolio of shares (equity securities) of companies that are either listed in European countries, or if listed outside Europe, exercise a significant part of their economic activities in European countries.

Essential features of the Fund:

- The Fund will be invested primarily in large and mid-cap companies and to a lesser extent (up to 10% of the Net Asset Value of the Fund) in small cap companies (defined as less than £1 billion market capitalisation) that are listed on a recognised stock exchange.
- The Fund is actively managed by the investment manager who has full discretion in selecting the investments held in the Fund and not constrained by the benchmark. The Fund will target a trailing 12-month yield of 10% (1.1x) higher than the benchmark (FTSE Developed Europe Index - Net Tax TR GBP), however this cannot be guaranteed.
- The choice of assets is guided by high dividends and dividend growth.
- There is no industry or sectoral focus to the Fund.
- There will be no leverage in the Fund.
- Depending on the market conditions, the Fund may at any time at the investment manager's discretion take a defensive investment strategy and may move up to 100% of the portfolio (i.e. up to 100% of its net asset value) to money market instruments or cash.
- The Fund will not use financial derivatives instruments.
- This share class is an accumulating share class and, therefore, it is not currently intended to distribute dividends to the Shareholders.
- You can buy and sell shares in the Fund on any day, except Saturday or Sunday, when banks in Dublin and London are open for normal business.

Risk and reward profile

- This indicator shows how much a fund has risen and fallen in the past, and therefore how much a fund's returns have varied. It is a measure of the fund's volatility. The higher a fund's past volatility the higher the number on the scale and the greater the risk that investors in that fund may have made losses as well as gains. The lowest number on the scale does not mean that a fund is a risk free investment.
- This share class has been classed as 5 because its volatility has been measured as above average.
- The risk and reward score is not guaranteed and may change over time.
- The Fund invests in shares of companies and the value of these shares and the income from them can go down as well as up due to changes in the company, its industry, changes in currency or the economy in which it operates.
- This indicator is based on historical data and may not be a reliable indication of the future risk profile of this Fund.
- The Fund is suitable for investors with a long term holding period and who have a moderate to high risk appetite.
- There can be no assurance that the investment objective and policy of the Fund will be achieved.
- For full details of the fund's risks, please see the prospectus which may be obtained from the address in 'Practical Information' overleaf.
